

Vehicle Safety Inspection Program Bulletin

ASED-016

Date: January 01, 2019
Bulletin: All Inspection Station Personnel
From: Automotive Safety Enforcement Division
RE: **Safety Equipment Repair Order Retention**

The Electronic Safety Equipment Repair Order E-SERO, implemented in 2008, does not provide a station copy and stations are not required to maintain a copy of E-SERO certifications. In an effort to be consistent and eliminate unnecessary record retention inspection stations are no longer required to retain station copies of handwritten SERO's. SERO's certified for post manufacture window tint still require completion and retention of the Post Manufacture Window Tint Report if the vehicle is equipped with add-on tint, or the Post Manufacture Window Tint Exemption Form if an exemption is submitted to allow certification of medically approved add-on tint. Forms by ASED personnel. advised otherwise
